SUMMARY

Full-Stack Developer specializing in SaaS platforms, AI-powered products, and automation systems. Built and shipped production applications across education, retail, and hiring from architecture to deployment using Next.js, Node.js, and MongoDB.

SKILLS

Frameworks: Next.js, React.js, Node.js, Express.js, React Native

Programming: Typescript, Javascript, C#, Liquid (Shopify)

Databases: MongoDB

DevOps: AWS EC2, AWS S3, Cloudflare, Github Actions

Tools/Platforms: Redis, Socket.IO, Stripe, Shopify, Make.com, Airtable, Webflow, OpenAI API

Languages: Arabic, English

PROFESSIONAL EXPERIENCE

Makan Design, Remote: Fullstack developer

Jul 2024 – Apr 2026

- Built a full-stack CRM from scratch (Next.js, Node.js, MongoDB) centralizing projects, clients, quotations, vendors, and financials replacing fragmented workflows across spreadsheets, Airtable, and WhatsApp.
- Engineered an advanced quotation engine with versioning, product catalog management, AI-powered multilingual translations, and e-signature integration via Signit.
- Rebuilt the Airtable → Shopify product sync pipeline in Node.js, reducing operational costs by 75% and improving sync speed by 50%.

Tafawwaq – Education Platform, Remote: Part-time Fullstack developer

Jul 2025 – Feb 2026

- Built a production-grade tutoring marketplace (Next.js, Node.js, TypeScript) with live 1-on-1 video sessions via VideoSDK, real-time chat via Socket.io, and a full booking lifecycle engine.
- Integrated Stripe for student payments and Stripe Connect for teacher payouts, including a balance ledger system with hold periods and withdrawal tracking.
- Built a full admin panel covering user management, tutor review, payout management, refund processing, session recordings, and platform analytics.

Khamsat, Fiverr, Online: Freelancer

May 2020 – Sept 2023

- Completed 80+ projects (5.0 rating), specializing in automation tools, APIs, and bot development.

RELEVANT PROJECTS

Menulizer – Restaurant Digital Menu

Sep 2025 - Nov 2025

- Built a QR-based menu system for restaurants using Next.js and MongoDB.
- Customers can scan a QR code to access the menu instantly without installing an app.

Joblizer – AI Job Screening Platform

Jun 2025 - Jul 2025

- Developed a platform that analyzes candidate resumes using OpenAI API and generates match scores, strengths, and skill gaps.
- Enabled one-click job applications and automated interview invitations.
- Built with Next.js, Node.js, and MongoDB.

Widget Ease – AI Customer Support Chat

Apr 2025 - May 2025

- Built an AI-powered customer support chat with an AI agent that learns from website content and conversations to automate responses and reduce support workload.

EDUCATION

B.S. in Computer Science

Graduated Jun 2024

Nahda University, Bani Sweif, Egypt

Relevant coursework: Software/Hardware Design, Programming Languages, Programmable Logic
